

The Missing Piece of Your PMS

Seamlessly integrate PassportScan Cloud to automate check-ins, ensure compliance, and elevate the guest experience.

Is Your PMS Living in Isolation?

A **Property Management System** is the source of truth for your hotel, but manual data entry creates a bottleneck. Without integration, staff are stuck manually typing passport details, scanning paper forms, and physically verifying compliance.

Inefficient Processes

Time-consuming manual entry.

Data Inaccuracy

Human error in data capture.

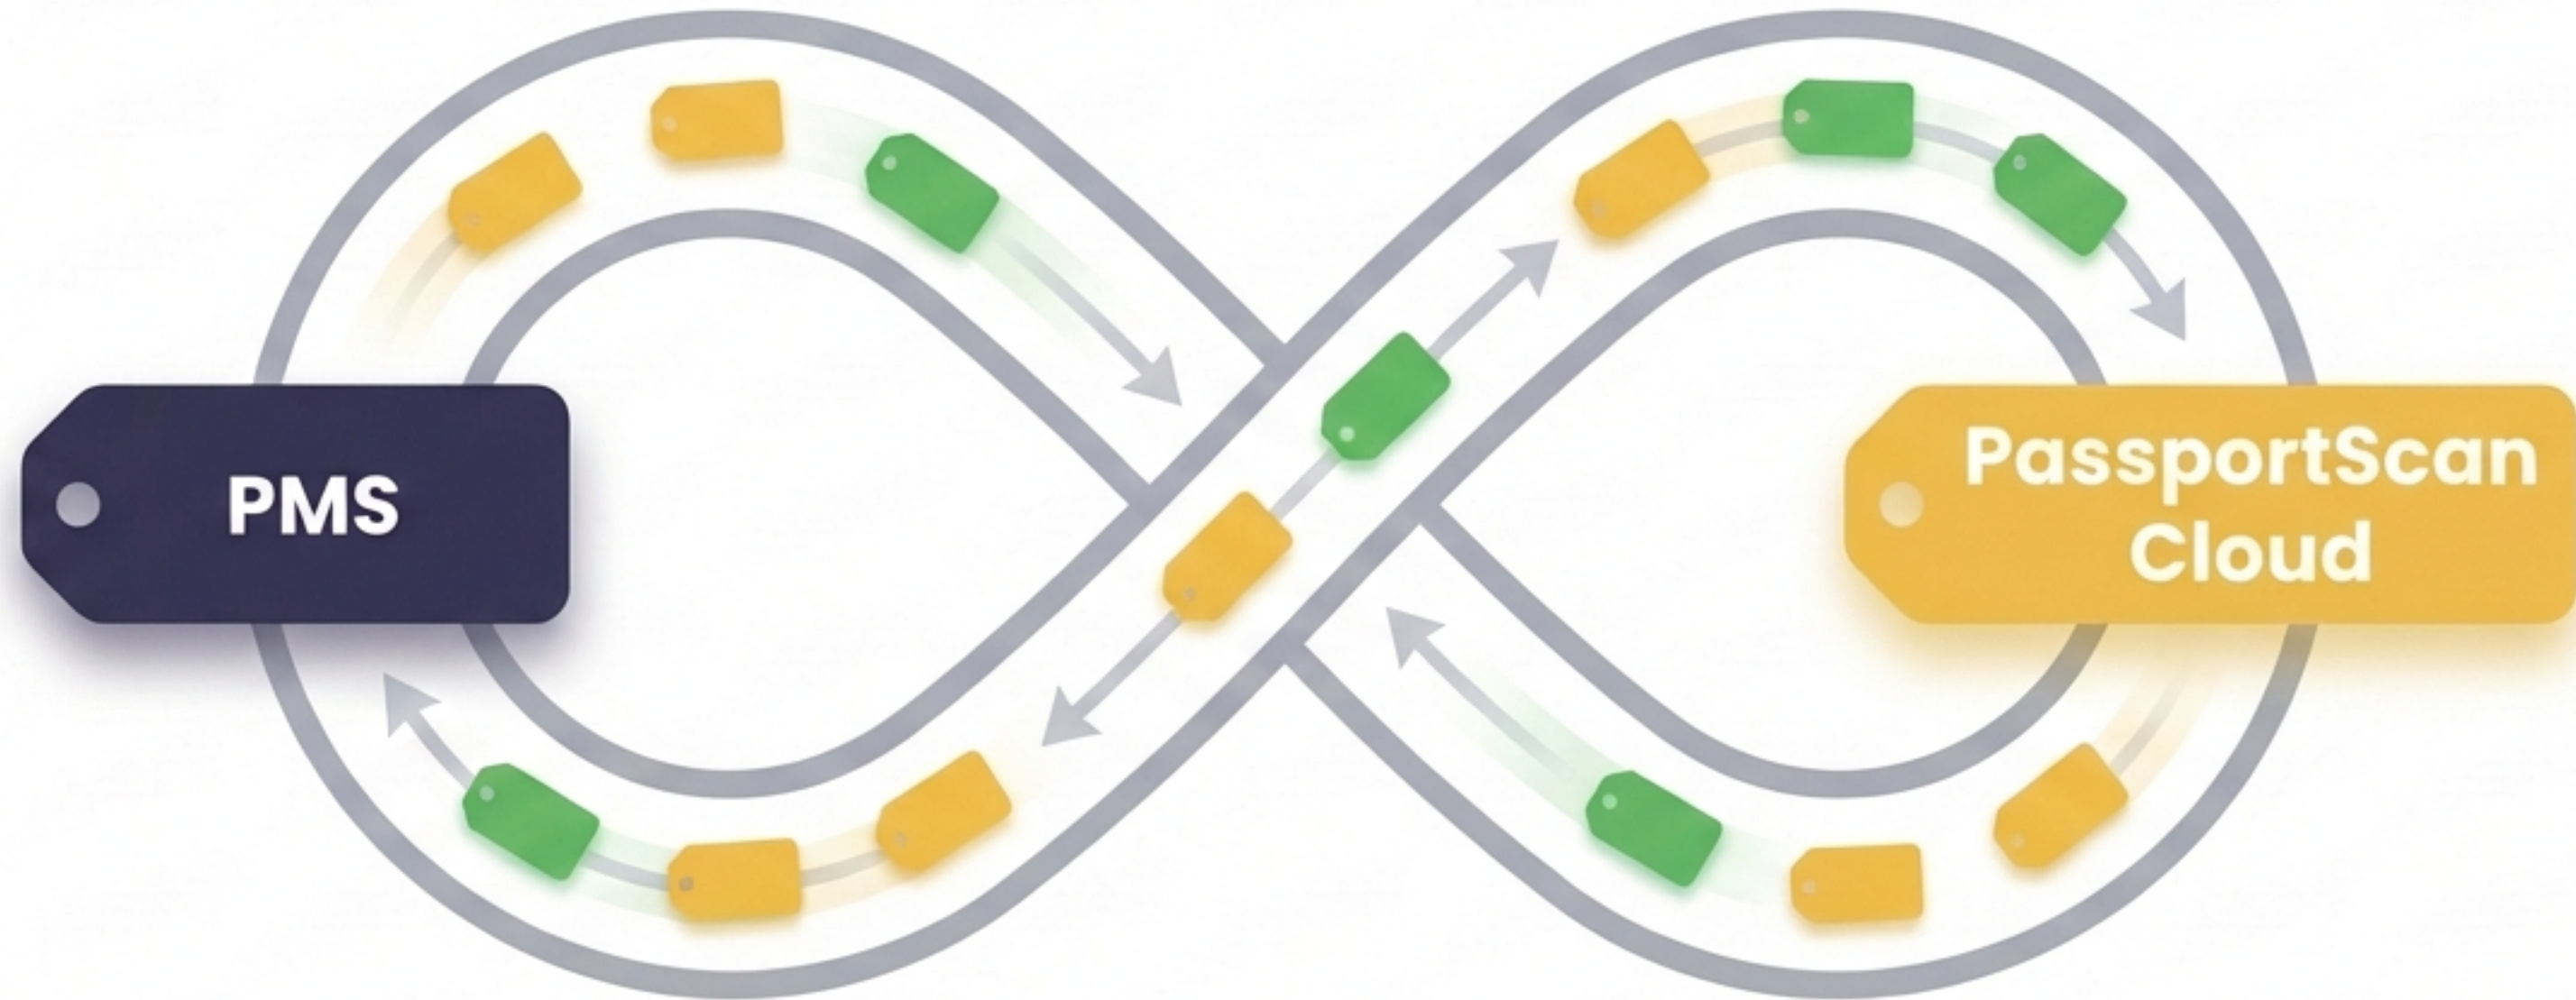

Compliance Risks

Fragmented GDPR compliance.

Synchronization. Automation. Speed.

Connect your PMS to our API for instant, bi-directional communication. By using APIs and callback functions, we synchronize customer profile data in real-time between the PMS and the PassportScan platform.

Information is kept up-to-date in both directions automatically—no typing required.

Eliminate Administrative Friction

Staff focus on the guest, not the keyboard.

Automating Legal Compliance

Your PMS manages bookings; we manage the legalities. The integration ensures that signed privacy consents and police reporting data are securely linked to the PMS reservation.

Police Integration: Automatic forwarding of arrival data to police and National Statistical Offices.

Secure Storage: Encrypted cloud storage with customizable data retention rules (auto-delete).

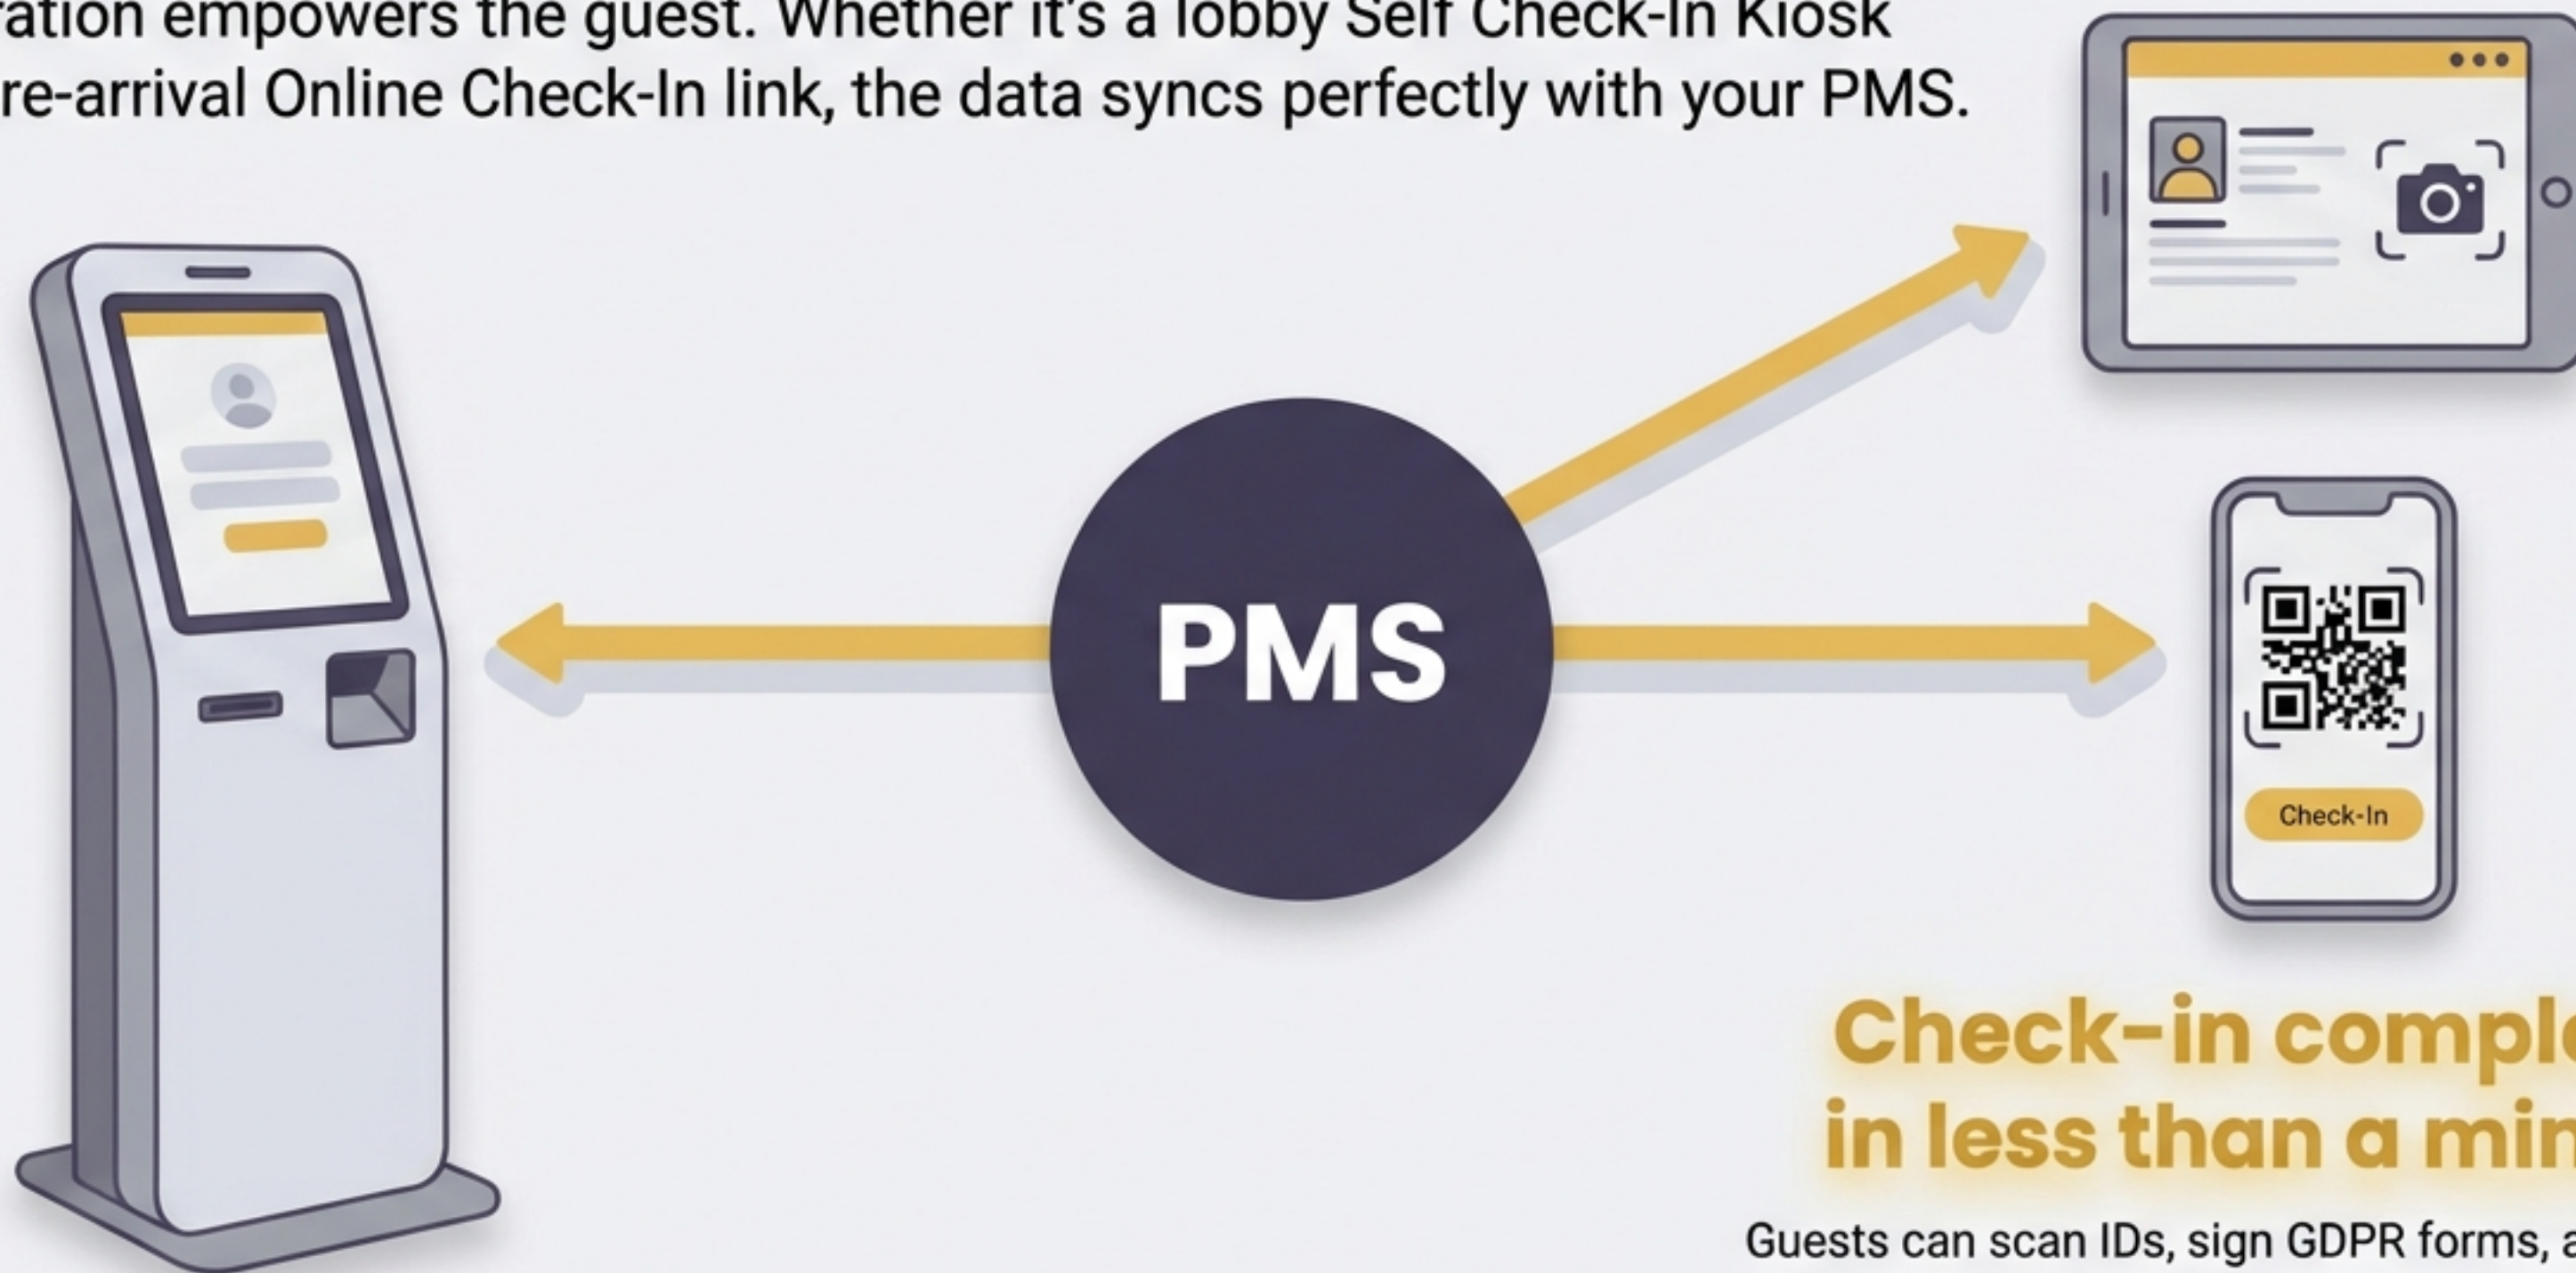

Audit Trail: Digital consent forms and signatures are linked directly to the guest profile.

Additional Features

Integration empowers the guest. Whether it's a lobby Self Check-In Kiosk or a pre-arrival Online Check-In link, the data syncs perfectly with your PMS.

**Check-in completed
in less than a minute.**

Guests can scan IDs, sign GDPR forms, and verify details independently, **reducing front desk traffic.**

Plug-and-Play Compatibility

We are already integrated with leading PMS software. Our directory is updated regularly to ensure seamless connectivity from global chains to boutique hotels.

The background features a large, faint number '6500' and a grid of light blue folder icons. A dark blue rounded rectangle is centered over the number.

Trusted by 6,500+ companies

Flexible Integration Options

A Streamlined Path to Certification

Built for Developers, Designed for Hotels

Callback Functions: Immediate triggers when events happen to ensure real-time sync.

Secure Handshake: Mandatory NDA and technical validation process.

Zero Fees: The integration process requires no payment of fees for the developer/partner.

Proven Success in the Field

Requests implemented
in a very short time...
assistance service
available and effective.

— **Alfred Calandra**,
IT Technician,
Rocco Forte Hotels

Easy to use and saves
a lot of time. The
overall is highly
commendable.
